Let Our Warehouse Be Your Warehouse

H2O Filter Warehouse will drop ship orders to your customers. If you have customers that you ship to, we can offer you the opportunity to save on shipping, warehousing and handling costs by letting us stock and ship products to your customers, so you don't have to.

UPS

- Blind shipments with no H2O Filter Warehouse markings on boxes or labels
- Order confirmations faxed or emailed
- Shipping confirmations with tracking #'s emailed
- Same or next day shipping
- Use your packing list (when you email it to us)
- Daily pick ups with UPS & FedEx
- Shipping Terms: Prepay And Add
- Save the cost of shipping between us and you

Our family of friendly and knowledgeable staff members has over 80 years of experience in water treatment.

Pentek® ChlorPlus® Series
Radial Flow Carbon Block Cartridges

Part Number	O.D. × Length	Chlorine Taste & Odor Reduction Capacity @ Flow	Chloramine Reduction @ Flow	Nominal Micron Rating	Initial ΔP @ Flow
ChlorPlus-10	2½" × 9¾"	>50,000 gal. @ 1.0 GPM	1,000 gal @ 1.0 GPM	1μ	6.0 psid @ 1.0 GPM
ChlorPlus-20	2½" × 20"	>100,000 gal. @ 2.0 GPM	2,000 gal @ 2.0 GPM	1μ	6.0 psid @ 2.0 GPM
ChlorPlus-10BB	4¼" × 9¾"	>250,000 gal. @ 2.0 GPM	3,500 gal @ 2.0 GPM	1μ	6.0 psid @ 2.0 GPM
ChlorPlus-20BB	4¼" × 20"	>500,000 gal. @ 4.0 GPM	7,000 gal @ 4.0 GPM	1μ	6.0 psid @ 4.0 GPM

The ChlorPlus® carbon block cartridges help reduce sediment while providing greater chloramine performance capacities than granular carbon. They also significantly reduce the carbon fines found in many granular canisters. All of these cartridges utilize advanced activated carbon technology which allows superior chloramine and chlorine reduction.

Pentek® EPM Series
Carbon Block Cartridges

Part Number	O.D. × Length	Chlorine Taste & Odor Reduction Capacity @ Flow	Nominal Micron Rating	Initial ΔP @ Flow
EPM-10	2⅞" × 9¾"	>3,000 gal. @ 1.0 GPM	10μ	1.5 psid @ 1.0 GPM
EPM-20	2⅞" × 20"	>6,000 gal. @ 2.0 GPM	10μ	1.0 psid @ 2.0 GPM
EPM-BB	4⅝" × 9¾"	>15,000 gal. @ 2.0 GPM	10μ	5.0 psid @ 2.0 GPM
EPM-20BB	4⅝" × 20"	>30,000 gal. @ 4.0 GPM	10μ	4.0 psid @ 4.0 GPM

EPM Series cartridges are manufactured using a patented process that yields a cartridge with a nominal 10 micron filtration rating, high porosity as well as chlorine taste & odor reduction. The high porosity design helps prevent the cartridge from plugging before its adsorption capability is exhausted, maximizing the utilization of the carbon while maintaining low pressure drop.

These cartridges are protected by Endurawrap®, a uniquely formulated polyolefin bilaminate pre-filter, designed to significantly increase the useful life of the cartridge by trapping sediment that typically plugs carbon block cartridges. EPM Series cartridges are manufactured entirely from FDA-compliant materials making them an ideal choice for a wide range of residential, food service, commercial and industrial applications.

Pentek® EP Series
Carbon Block Cartridges

Part Number	O.D. × Length	Chlorine Taste & Odor Reduction Capacity @ Flow	Nominal Micron Rating	Initial ΔP @ Flow
EP-10	2⅞" × 9¾"	>6,000 gal. @ 1.0 GPM	5μ	3.4 psid @ 1.0 GPM
EP-20	2⅞" × 20"	>12,000 gal. @ 2.0 GPM	5μ	3.4 psid @ 2.0 GPM
EP-BB	4⅝" × 9¾"	>22,000 gal. @ 2.0 GPM	5μ	4.3 psid @ 2.0 GPM
EP20-BB	4⅝" × 20"	>40,000 gal. @ 4.0 GPM	5μ	5.5 psid @ 5.0 GPM

EP Series carbon briquette cartridges are manufactured using a patented process that yields a cartridge with a nominal 5 micron filtration rating, high dirt-holding capacity. A high porosity design helps prevent the cartridge from plugging before its adsorption capacity is exhausted, maximizing the utilization of the carbon while maintaining low pressure drop.

These cartridges are protected by Endurawrap®, a uniquely formulated polyolefin bilaminate pre-filter, designed to significantly increase the useful life of the cartridge by trapping sediment that typically plugs carbon block cartridges. EP Series cartridges are manufactured entirely from FDA-compliant materials making them an ideal choice for a wide range of residential, food service, commercial and industrial applications.

Pentek® CBC Series
Carbon Block Cartridges

Part Number	O.D. × Length	Chlorine Taste & Odor Reduction Capacity @ Flow	Absolute μm Rating	Nominal Micron Rating	Initial ΔP @ Flow
CBC-10	2½" × 9¾"	>20,000 gal. @ 2.0 GPM	1μ	0.5μ	3.7 psid @ 2.0 GPM
CBC-20	2½" × 20"	>45,000 gal. @ 2.0 GPM	1μ	0.5μ	3.0 psid @ 2.0 GPM
CBC-BB	4¼" × 9¾"	>50,000 gal. @ 2.0 GPM	1μ	0.5μ	4.6 psid @ 2.0 GPM
CBC-20BB	4¼" × 20"	>150,000 gal. @ 4.0 GPM	1μ	0.5μ	8.5 psid @ 4.0 GPM

CBC Series cartridges are highly effective at reducing unwanted bad taste and odor, as well as chlorine taste & odor, from potable drinking water. The unique structure of the carbon block enables it to reduce Giardia, Cryptosporidium, Entamoeba, and Toxoplasma cysts and fine sediment particles down to 0.5 microns.*

CBC Series cartridges are manufactured using a patented process and made entirely from FDA-compliant materials. They are an ideal choice for a wide range of residential, food service, commercial and industrial applications. They also make excellent polishing filters or pre-filters in applications requiring fine filtration and high capacity.

Pentek® FloPlus™ Series
Carbon Block Cartridges

Part Number	O.D. × Length	Chlorine Taste & Odor Reduction Capacity @ Flow	Absolute μm Rating	Nominal Micron Rating	Initial ΔP @ Flow
FloPlus-10	2½" × 9¾"	>10,000 gal. @ 1.0 GPM	1μ	0.5μ	2.0 psid @ 1.0 GPM
FloPlus-20	2½" × 20"	>20,000 gal. @ 2.0 GPM	1μ	0.5μ	2.0 psid @ 2.0 GPM
FloPlus-10BB	4¼" × 9¾"	>25,000 gal. @ 2.0 GPM	1μ	0.5μ	4.0 psid @ 2.0 GPM
FloPlus-20BB	4¼" × 20"	>50,000 gal. @ 4.0 GPM	1μ	0.5μ	4.0 psid @ 4.0 GPM

FloPlus™ cartridges utilize a revolutionary new technology that significantly enhances the traditional Fibredyne® product, making it possible to obtain cyst reduction in a cartridge that functions like a nominal 10 micron cartridge. This product boasts extremely low pressure drops and high flow rates – comparable to 10 micron (very open) carbon cartridges. Its efficiency is so high that a 0.5 micron rating is possible, which means that cysts and very small particles can be removed to create cleaner, safer water.

This product is ideal for applications where pressure drop and low flow have been chronic problems in the past, as well as whole house water treatment with the addition of cyst reduction. However, it will address the needs of any end user looking for a product that offers high flow, low pressure drop, infrequent cartridge changes and cyst-free water.

* Based on manufacturer's internal testing.

Features & Benefits:

High Quality Replacement Filter Elements

The OMB-Series of replacement cartridges feature high quality carbon block media is manufactured from raw materials to precise specifications entirely at the Omnipure US manufacturing facility.

With the highest volume in the industry, the OC-Series filter elements are designed to fit most standard 4⅞", 9¾" and 20" cartridge housings. Omnipure utilizes a spring loading device to compress the media, reducing media migration and ensuring that the water passes properly through the media for optimum filtration. Ask your Omnipure representative about custom formulations and alternative finishing options.

Filter elements are available in 10 micron, 5 micron, 1 micron and 1 micron lead reduction formulations. Elements are finished with a single layer of spun-bonded polypropylene netting. Polypropylene end caps with compression gaskets are standard. Quality American made carbon blocks you can trust.

Features & Benefits:

Contaminant Reduction
Reduces other chemicals and contaminants in addition to common particulates*

Chlorine taste and odor reduction based on NSF/ANSI Standard 42*, Lead and cyst reduction based on NSF/ANSI Standard 53*

Premium Fine Mesh Coconut Shell Carbon Standard
Activated coconut carbon for purest filtration

Low Pressure Drop
Unique flow-through construction offers lower pressure drop than traditional cartridges

Quality Produced and Made in the USA
Cartridges are manufactured in the USA for Aries FilterWorks, a division of ResinTech®. Strict quality control over all aspects of production allows complete traceability of every cartridge.

*Based on Internal Manufacturer's testing

Omnipure
Q Series

The Q-Series is the ultimate "user friendly" inline filter on the market. Replacement of the spent media bed is completed, in a matter of seconds, by detaching the filter body from a permanent head with a twist of the wrist. The new filter body is just as easily threaded into the head, and the replacement is then complete. The Q-Series is also available with the optional Twist Tap in-head valve system, which automatically turns the supply water off when the body is disconnected from the head. No tools. No drips. No hassles.

The Q-Series is designed to give customers a high quality, economically priced alternative to similar products on the market. Omnipure's engineering and production expertise enables them to offer both the initial unit and the replacement bodies at a significantly lower price than the competition.

Omnipure
L Series

Made of highly durable injection-molded polypropylene, the L-Series is constructed from 100% NSF (National Sanitation Foundation) certified materials. Omnipure offers a variety of standard media options including granular activated carbon (GAC) for taste and odor reduction, depth filtration media to address sand, grit and sediment problems that can clog or damage down line equipment and a special blend polyphosphate media designed to control scaling associated with hard water.

The L-Series can also be ordered with the premium OmnipureBlock™ media. This family of carbon blocks utilizes technology that optimizes surface area for better contaminant absorption. Omnipure-Block™ is available in a high capacity ten micron activated carbon version and a water polishing, cysts-reducing one micron version. A carbon/scale inhibitor and carbon/lead reduction version are available for your specific application needs.

Omnipure
ELF Series

The ELF-Series of filters from Omnipure was designed specifically for the higher volume requirements for the food service industry. In contrast to what the name implies, the new ELF's (Extra-Large Format) capacity of up to 20,000 gallons and flow rates of up to 2.0 gal/minutes, make it ideal for use in restaurants, cafes, coffee shops and vending machines.

The ELF-Series is engineered in a two-piece configuration with a permanent head and a bayonet style replaceable polypropylene body. This configuration helps to reduce cost as simple body replacement is cheaper than replacing the entire filter apparatus. Replacement is fast and easy. The body is quickly detached from the head with the twist of a wrist, no tool required.

Omnipure
E Series

The new E-Series was designed for customers that are already using existing permanent heads but would like an alternative to the replacement bodies currently offered.

The main benefit of the E-Series is price to performance value. E-Series filters, with equal or superior filtration capability, are offered at a considerably lower price than comparable replacement bodies on the market.

Omnipure utilizes several media or media combinations to address standard water problems including granular activated carbon (GAC), polypropylene depth filtration, and polyphosphate. Omnipure also offers one or ten micron carbon blocks, carbon blocks with lead sorbent material and carbon blocks with scale inhibitors to address specific water conditions.

Caware
MAF-14EP
HOLLOW FIBER MEMBRANE & CARBON BLOCK

CARTRIDGE REPLACES EVERPURE H-300, H-104, OW200L & MORE

Cartridge Diagram

0.1 Micron Hollow Fiber Membrane
Removes 99.999% of Bacteria
By Mitsubishi

Carbon Block Element
With Lead Selective Ion Exchange Media

25 Micron Polypropylene Layer

Model	Capacity	Flow	Bacterial Removal
MAF-14EP	3,000 Gal.	1 GPM	✔
H-300	300 Gal.	0.5 GPM	✖
H-104	1,000 Gal.	0.5 GPM	✖

Features:

Removes:
Chlorine • Taste • Odor • Cysts
• Lead • 99.999% Bacteria Removal

Reduces:
VOCs • THMs • Sediment/Turbidity

Operating Conditions:
Working Pressure: 5-140 psi (34-963 kpa)
Temperature: 39-100°F (4-38°C)
Flow Rate: 1.0 GPM (3.8 LPM)
Chlorine Removal Capacity: 3,000 Gallons
Lead Removal Capacity: 1,000 Gallons

Cartridge Fits in Existing Everpure QL2 & QL3 Heads

- AMBF's Melt Blown elements are manufactured in-house with the fastest, most modern equipment ever produced, giving you the highest quality filter on the market today
- Elements are made from 1 to 100 micron in standard, high efficiency, absolute and heavy duty grades, giving you control of your filtration process
- Elements are also produced with an integrated 3 stage process yielding true depth filtration
- All elements are made with FDA compliant material for food and beverage contact under CFR Title 21
- Elements are produced in standard and custom sizes to meet all applications
- End caps are thermally welded onto the cartridge with no use of glue or other binders
- Elements are produced with 100% polypropylene or nylon materials
- Elements can be produced with or without a core depending on your application
- "BE" Melt Blown Cartridges are Tested and Certified to: NSF/ANSI 61 Standard & NSF/ANSI 42 Standard for Component

Shelco® String Wound Sediment Cartridges

Shelco® has created the MicroSentry™ cartridge, setting a higher standard for industries requiring cartridge filtration. Shelco® equipment makes achieving precision patterns a matter of standard procedure. State of the art computerized production machinery takes the variables out of custom winding and enables production of filter cartridges that are accurately wound from a single strand of specially selected fibrous roving material, wound around a perforated core in a nearly perfect geometric pattern.

MADE IN THE U.S.

SharkBite®
FITTINGS, PEX PIPE & CONNECTORS

THE TOTAL PLUMBING SOLUTION

SharkBite is a provider of popular Quick-Connect Brass Fittings as well as SharkBite PEX Piping and Connectors.

WHY SHARKBITE?

Spend any amount of time working with plumbing fittings and you'll see why SharkBite is the most trusted name in the industry.

LEAD FREE

The Reduction of Lead Safe Water Drinking Act went into effect January 2014. Since October 2012, SharkBite has been shipping all Lead Free products in anticipation of the Act.

QUALITY

Compatible with Copper, CPVC, PEX, PE-RT & HDPE pipes. No matter what you're connecting, SharkBite has you covered. Solutions also available for transitioning from PVC and Polybutylene pipe.

WARRANTY

You take your job seriously and follow the local, state and federal requirements to a tee. When installing SharkBite products you follow all the plumbing, heating and mechanical codes as well as SharkBite's guidelines. You should be rewarded for that. That's why SharkBite offers a warranty of 25 years.

BUTTRESS THREAD DESIGN   **ACME THREAD DESIGN**

Buttress Threads vs Acme Threads

Buttress Threads provide superior sealing and higher burst ratings than the Acme threads found on most housings. Watts/Flowmatic® and Pentek® Housings on this page, and Pentek® 3G Housings on Page 51 all feature buttress threads.

PENTAIR

Pentair's industry-leading filtration systems give you water that is clean, pure, and refreshing every time.

Pentair Filter Housings are manufactured from durable polypropylene or clear Styrene–Acrylonitrile (SAN). Reinforced polypropylene housings have excellent chemical resistance and are ideal for many residential, commercial and industrial applications. Clear sumps are manufactured from FDA compliant Styrene–Acrylonitrile (SAN). They offer on-site examination of the cartridge and have excellent chemical compatibility.

Buttress Thread Design on Pentair 3G Housings provides superior sealing and greater security than housings with standard acme threads.

Buttess Thread Design

HM Digital™ Meters & Monitors

Handheld TDS Meters/PH Tester

Part Number	Description	Stock	Your Price
TDS-3	Most Popular Digital TDS Meter & Thermometer for Professionals; Measures From 0 – 9,990 ppm	S	Call for Pricing
COM-100	Professional Waterproof EC/TDS Meter & Thermometer; Measures From 0-8,560 ppm/ 0-9,990 µS	S	Call for Pricing
ORP-200	Professional Waterproof ORP Meter & Thermometer; Measures from -999 to +1,000 mV	S	Call for Pricing
PH-80	pH/Temperature Waterproof Hydro Tester	S	Call for Pricing

Filter System TDS Meters/Water Flow Monitors

Part Number	Description	Stock	Your Price
DM-1	2-Stage Inline TDS Monitor	S	Call for Pricing
DM-2	Deluxe In-Line Dual TDS Monitor w/ ¼" Fittings, Water Resistant Case	S	Call for Pricing
FM-1	5-Stage Inline Monitor (Timer Function Only), with Faucet Indicator Light	S	Call for Pricing

DM-1 Features:

- Displays TDS levels of the feed water and product water with in & out electrode probes
- Great instant check for system performance

DM-1

DM-2 Features:

- Highly efficient and accurate
- Displays TDS levels of the Feed & Product Water with in & out probes
- Auto-Off function conserves battery power (Auto shut off after 3 minutes)
- Factory Calibrated
- Diagnostic error messaging
- Shielded sensor cables
- Comes equipped with two ¼" T-fittings (Also available with ⅜" or ½" fittings)

DM-2

Filter Monitor Features:

- Monitors based on Time
- Multiple settings and alerts
- Volumizer
- Attractive design
- Innovative flow switch
- Chrome tri-color faucet disc (works with any standard non-air gap faucet)
- Color-coded lights indicate filter usage

FM-1

Structural Polyglass™ Tanks

The highest quality pressure vessel for residential and light commercial water softener/filtration applications. Structural Polyglass™ pressure vessels provide years of reliable service for water softener and water filtration applications. These slim-diameter tanks hold up to 49 gallons of water and offer unmatched strength and chemical resistance.

All Polyglass™ residential tanks are backed by an exclusive 10-year warranty. Structural's patented manufacturing process creates a seamless polyethylene shell that is wound continuously with miles of fiberglass reinforcements and sealed with epoxy resin. Computer-aided winding machines and other customized equipment are used to create a product that offers outstanding performance and durability.

Structural pressure vessels provide cost-effective solutions for the most challenging applications. Using the latest technologies, Structural critically evaluates every design detail to ensure their products meet or exceed ISO, AMSE, NSF, & other agency standards.

ACID WASHED, COCONUT SHELL GAC

Ideal for chlorine removal in whole house applications

NSF — NSF Certified Component

- ♦ **12 × 40 Mesh Size**
- ♦ **1 Cubic Foot Bags**
- ♦ **Net Weight: 27.85 & 28.05 lbs.**

Granular Activated Carbon Media

Part Number	Description	Mesh Size	Bag Size	Wgt	Stock	Your Price
HS-12x40	AquaSorb® 1 ft³ Bag of Coconut Shell GAC, NSF 42 Certified	12 × 40	1.0 ft³	27.85 lbs.	S	Call for Pricing
CX-MCA	AquaSorb® 1 ft³ Bag of Catalytic Carbon, NSF 61 Certified	12 × 40	1.0 ft³	28.05 lbs.	S	Call for Pricing

Coconut shell activated carbon has a very high hardness and is more abrasion resistant than any other type. It is a totally natural, environmentally friendly product that has a very small carbon footprint, since it is derived from coconut shells. As most of its pore structure consists of micropores (more than 80%), coconut shell carbon can efficiently absorb impurities with micropore molecular structure, such as those present in drinking water. In addition, because of its high abrasion resistance and exceptional chemical and physical characteristics, only coconut shell activated carbon can support applications such as recovery of gold and other precious metals.

The very large internal surface areas characterized by microporosity along with high hardness and low dust make these coconut shell carbons particularly attractive for water and critical air applications as well as point-of-use water filters and respirators.

Features:

- ♦ Highly effective for removal of trace level organics
- ♦ Acid washed to reduce ash and enhance purity
- ♦ Highly microporous and high surface area
- ♦ Excellent mechanical hardness

Coconut Shell Carbon (HS-12x40)

AquaSorb® HS is an acid washed high purity high activity granular activated carbon manufactured by steam activation from carefully selected coconut shells. This activated carbon is produced for use in ultra-pure water treatment systems requiring low conductivity and exceptionally high purity. This activated carbon is also specifically designed for the removal of heavy hydrocarbons from recovered condensate. The acid washing process removes soluble silica from the matrix of the activated carbon to prevent leaching into the condensate.

Specifications:

- ♦ **NSF / ANSI 42 Certified**
- ♦ **Surface Area - 1,050 m2/g**
- ♦ **CTC Activity - 55%**
- ♦ **Iodine Nuber - 1,000 mg/g min.**
- ♦ **Moisture Content - 5% max.**
- ♦ **Total Ash Content - 1% max.**
- ♦ **pH - 5 - 7**
- ♦ **Hardness - 98% min.**

Catalytic Carbon (CX-MCA)

AquaSorb® CX-MCA is a catalytic, high activity granular activated carbon manufactured by steam activation of select coconut shell charcoal. The catalytic activity of this activated carbon makes it highly effective for the removal of chloramines and hydrogen sulfide from potable water. Its large micropore volume makes it particularly well suited for the removal of low molecular weight organic compounds and their chlorinated by-products such as chloroform and other trihalomethanes (THMs). An important feature of this material is its superior mechanical hardness and the extensive dedusting during its manufacture ensures an exceptionally clean activated carbon product.

Specifications:

- ♦ **NSF / ANSI 61 Certified**
- ♦ **Surface Area (BET) - 1,060 m2/g**
- ♦ **CTC Activity - 50% min.**
- ♦ **Apparent Density - 514 kg/m3**
- ♦ **Bed Density, Backwashed & Drained - 437 kg/m3**
- ♦ **Iodine Nuber - 1,000 mg/g min.**
- ♦ **Moisture Content - 5% max.**
- ♦ **Total Ash Content - 4% max.**
- ♦ **pH - 10**
- ♦ **Ball-pan Hardness - 98% min.**
- ♦ **Catalytic Activity - 20° C min.**

FLECK®

STRUCTURAL ORIGINAL PRESSURE VESSEL

ResinTechInc INNOVATIONS IN ION EXCHANGE

Features:

Light Commercial/Residential twin tank system composed of a fiber–reinforced polymer valve body for superior strength and durability, non-corrosion and UV-resistance.

- Continuous service flow rate of 20 GPM with a backwash of 8.5 GPM
- Regenerates immediately when needed for continuous soft water
- Soft water regeneration for optimum operating efficiency and minimum maintenance

*Systems include noryl bypass. Tail pieces are sold separately.
**Systems with Fleck Controls include Stainless Steel Bypass w/ 1" FNPT ports.

Acid Neutralizing Systems

Features:
- Corrects Low pH
- Stops Copper Corrosion & Blue/Green Staining
- 1 Ft^3 Systems include:
  (1) 50 lb. bag of Calcite and
  (1) 50 lb. bag of FloMag
- 2 Ft^3 Systems include:
  (2) 50 lb. bags of Calcite and
  (2) 50 lb. bags of FloMag

NOW BUILT WITH NSF PENTAIR HOUSINGS

Each Unit is Pressure Tested

Assembled in the USA

- John Guest Quick-Connect Fittings & Tubing
- John Guest Angle Stop Valve & Tank Valve
- All Systems have ⅜" Fittings & Tubing After Bladder

Sales Brochure Available

- 50 & 100 GPD Models Include Pentair Membrane
- 60 GPD Models Include CSM Membrane
- Better Packaging Than Most RO's

Premium Encapsulated Cartridge Systems from Pentair

♦ Each Cartridge Head has Built-in Shutoff
♦ Cartridges Move Forward when Removed
♦ No Twisting or Floor Clearance Needed
♦ Extremely Easy to Change and Maintain

See Page 20 for Replacement Cartridges.

GRO Systems Include Installation Kit, Air-Gap Faucet & Bladder Tank.
Monitored Systems feature an Internal TDS Meter.
NSF 42, 58 & CSA B483.1 Certified.

VIQUA Arros
Ultraviolet Water Systems

Designed for a streamlined installation, giving you time for more.

The quality of water can change over time and become contaminated with microorganisms. The VIQUA Arros™ is the premium residential UV system from VIQUA.

Reduced Installation Complexity
Innovative chamber design, mounted controller, and high output UV lamp technology form a compact unit for a clean installation.

1. The Tidal™ chamber aligns the inlet and outlet ports on a single plane, saving time and material.
2. PolyProtect™ shield blocks UV light so the Arros™ UV can plumb directly to PEX and other polymer materials.
3. System mounting is simplified with an elongated steel bracket.

Optimized Treatment Performance
Equipped with Stream™ technology which enables more accurate in-lamp usage measurement.

Minimized Maintenance Hassle
4. The all-in-one design of the VIQUA Arros lamp unit is easier to handle.
5. Threaded plug for quick, clean draining.
6. Easy-to-navigate LCD touchscreen to identify replacement parts and dealer contact information.

How Ultraviolet Works
Ultraviolet Sterilization Inactivates Bacteria, Viruses and Parasites such as Cryptosporidium & Giardia. Chlorinated tap water only keeps bacteria at low levels. The difference between Chlorination and UV is the difference between Sanitization and Sterilization. UV Sterilization provides complete protection from Microbes in water.

It is estimated that seven to 30 million Americans develop a gastrointestinal illness from drinking contaminated water. The Center for Disease Control and Prevention estimates 900 to 1,000 deaths occur from microbial illnesses from US drinking water.

* For 1" plumbing; not NSF Listed.

Harmsco® WB WaterBetter® single-cartridge filters deliver high flow, extended filter life, increased dirt holding capacity and ease of operation. Certified to ANSI-NSF 61*
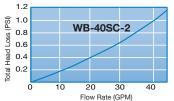

Applications

- Commercial/Residential Drinking Water
- Cooling Tower Filtration
- Desalination Pre-filtration (coated option)
- P.O.E. for household
- Industrial Waste Water Treatment
- Reverse Osmosis Pre-filtration
- Groundwater Remediation
- Utility Water

Features

- Patented Up-flow design
- Electropolished 304 stainless steel housing
- Fail Safe closure system
- Three sizes for greater media surface area
- CPVC standpipe (standard) - stainless steel optional
- Simple alternative to complex multiple cartridge housings
- Largest selection available of cartridge micron ratings and media, including carbon block
- Reduced installation cost
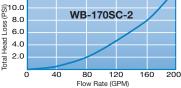

WB-40SC   WB-90SC   WB-170SC

The total head loss data shown above was developed by NSF International and indicates pressure drop with WaterBetter® filter housings and 20 micron filter cartridges in clean water.

Features

- Electropolished 304 stainless steel
- **Standpipe -** CPVC
- **Temperature -** 140°F (60°C) max. Up to 200°F (93°C) with optional stainless steel standpipe and high temperature cartridges installed
- **Pressure -** 150 psi (10 bar) max.
- **Wing nuts -** Brass
- **Rim gaskets -** EPDM (Buna-N, Viton available)
- BSTP optional

Harmsco® Hurricane® Filter Housings

Harmsco® HP Hurricane® filters provide unsurpassed performance. Our unique design separates dense solids prior to cartridge filtration for extended filter life, increased dirt holding capacity and reduced maintenance costs. Certified to ANSI-NSF 61.
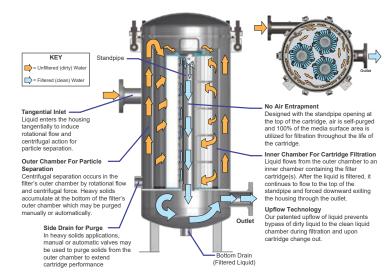

Applications

- Commercial/Residential Drinking Water
- Cooling Tower Filtration
- Desalination Pre-filtration (coated option)
- Surface Water Treatment Rule (SWTR) LT2
- Process Water
- Whole House Filtration
- Industrial Waste Water Treatment
- Reverse Osmosis Pre-filtration
- Small Community Compliance LT2
- Well Water
- Groundwater Remediation
- Groundwater Under Direct Influence (GUDI)

Features

- Combination cyclone separator and cartridge filter in a single compact design
- Patented Up-flow design with tangential entry – prevents air entrapment
- Rotational flow "flutters" media pleats – improving loading performance
- Electropolished 304 or 316L stainless steel housing
- Fail-Safe lid closure, rated for 150 psi
- Three sizes for greater media surface area
- CPVC standpipe (standard) – stainless steel optional
- Largest selection available of cartridge micron ratings and media, including carbon block
- NSF/ANSI Standard 61 Listed

**HUR-40-HP   HUR-90-HP   HUR-170-HP**

Harmsco Hurricane Technology

KEY
- = Unfiltered (dirty) Water
- = Filtered (clean) Water

Standpipe

Tangential Inlet
Liquid enters the housing tangentially to induce rotational flow and centrifugal action for particle separation.

Outer Chamber For Particle Separation
Centrifugal separation occurs in the filter's outer chamber by rotational flow and centrifugal force. Heavy solids accumulate at the bottom of the filter's outer chamber which may be purged manually or automatically.

Side Drain for Purge
In heavy solids applications, manual or automatic valves may be used to purge solids from the outer chamber to extend cartridge performance

Outlet

Bottom Drain (Filtered Liquid)

No Air Entrapment
Designed with the standpipe opening at the top of the cartridge, air is self-purged and 100% of the media surface area is utilized for filtration throughout the life of the cartridge.

Inner Chamber For Cartridge Filtration
Liquid flows from the outer chamber to an inner chamber containing the filter cartridge(s). After the liquid is filtered, it continues to flow to the top of the standpipe and forced downward exiting the housing through the outlet.

Upflow Technology
Our patented upflow of liquid prevents bypass of dirty liquid to the clean liquid chamber during filtration and upon cartridge change out.

Features

- Electropolished 304 or 316L stainless steel
- **Temperature -** 140°F (60°C) max. Up to 250°F (121°C) with optional stainless steel standpipe and high temperature cartridges installed
- **Pressure -** 150 psi (10 bar) max.
- **Wing nuts -** brass
- **Rim gaskets -** EPDM (Buna-N, Viton available)
- BSTP optional

This product is designed with a patented Up-flow technology which prevents the accumulation of air inside the filter housing keeping the filter operating at 100%. Certified to ANSI-NSF 61*

Applications

♦ Commercial/Residential Drinking Water
♦ Cooling Tower Filtration
♦ Process Water
♦ Reverse Osmosis Pre-filtration
♦ Groundwater Remediation
♦ Utility Water
♦ Industrial Waste Water Treatment
♦ Surface Water Treatment Rule (SWTR) LT2

Features

♦ NSF/ANSI Standard 61 listed
♦ Patented Up-flow design
♦ 304 stainless steel construction, standard
♦ Electropolished finish, standard
♦ 150 psi (10.3 bar) pressure rating
♦ Flow Rates up to 800 GPM
♦ All filter housings hydrostatically tested
♦ Easy cartridge installation, removal and service
♦ Individual studs for safe, secure lid closure
♦ Extensive choice of cartridge micron ratings and media

HIF SERIES

MADE IN THE US.

Filter Specifications

♦ **Filter Vessel / Metal Components -** 304 stainless steel, electropolished for increased resistance to corrosion
♦ **Holding / Lifting Rods, Standpipes and Pipe Caps -** CPVC, standard models; 304 stainless steel for All Stainless models
♦ **Rim Gaskets -** EPDM, standard; Buna-N, Viton available
♦ **O-rings -** Buna-N, standard; EPDM, Viton available
♦ **Bottom Seals -** natural gum rubber, standard; EPDM, Viton available

♦ **Pressure -** rated for pressures to 150 psi (10.3 bar) max
♦ **Temperature -** rated to 140°F (60°C) with CPVC rods, pipe caps, standpipes and standard Harmsco cartridges; to 200°F (93°C) for all stainless models with stainless steel rods, pipe caps and standpipes, and Harmsco High-Temp cartridges
♦ **Flow -** up to 800 GPM; typical flow rates are 4-6 GPM per single length (9-3/4")
♦ **Wing Nuts -** brass; optional brass hex nuts and stainless steel flat washers

Harmsco® Band Clamp housings are designed with a patented Up-flow technology which prevents the accumulation of air inside the filter housing keeping the filter operating at 100%.

Applications

- Commercial/Residential Drinking Water
- Cooling Tower Filtration
- Process Water
- Reverse Osmosis Pre-filtration
- Groundwater Remediation
- Utility Water
- Industrial Waste Water Treatment
- Groundwater Under Direct Influence (GUDI)

Features

- 304 stainless steel construction, standard
- Electropolished finish, standard
- 150 psi (10.3 bar) pressure rating
- Flow rates up to 126 GPM
- All filter housings hydrostatically tested
- Stainless steel cartridge lifters for easy cartridge removal
- Adjustable top plates to accept various length cartridges
- Two drains provided - inlet and outlet fluids
- Extensive choice of cartridge micron ratings and media
- Integral mounting legs, drill in place

Specifications

- **Finish -** Electropolish standard; poly coat optional
- **Inlet / Outlet -** 2" FNPT; sanitary, BSTP, victaulic connections optional
- **Closure -** Band clamp closure, O-rings Buna-N
- **Pressure -** Up to 150 psi (10.3 bar) max
- **Temperature -** up to 250°F(121°C), housing only
- **Construction -** 304 stainless steel standard; 316 optional

FSSS Series Filter Housings are designed with a double o-ring compression which allows for positive sealing and easy access. Offered in DOE (double open end) or 222/Flat configurations.

Applications

- Food & Beverage Filtration
- Reverse Osmosis Filtration
- Process Water Filtration
- Cutting Fluids
- Lubricants
- Plating Solutions
- High Purity Water
- Inks

Features

- 304 or 316 stainless steel construction
- 300 PSI (20.7 bar) pressure rating
- Electro-polished finish
- Offered in Double Open End or 222 / Flat configurations
- Double o-ring compression seal for easy change out
- Includes 1/8" NPT vent and 1/8" NPT drain
- Inline design for easy installation
- Knife edge seal at both cartridge ends to eliminate by-pass for DOE cartridges
- Standard with wrench and mounting bracket

Specifications

- **Finish -** electro-polished
- **Inlet/Outlet -** 3/4" on 9-3/4" housings and 1" on 20" housings
- **Construction -** 304 or 316 stainless steel
- **Pressure -** up to 300 psi (20.7 bar) max
- **Temperature -** up to 250°F (121°C) (filter housing only)
- **O-ring Closure Seal -** silicone (standard)

NSF CERTIFIED

BIG-BUBBA®
— F I L T E R S —

Rugged Construction

Big-Bubba filter housings are made of rugged, glass-reinforced polypropylene so they will not chip, rust, or dent. And because all wetted surfaces are non-metallic, they are ideal when chemical compatibility is an issue and for sea water applications.
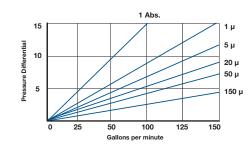

Applications

Big-Bubba filters are ideal for a wide range of applications, including:

- Commercial filtration
- Industrial filtration
- Pre-filtration for RO equipment
- Community water systems
- Sea water applications due to their non-corrosive construction
- Replacement for bag filters for more filter area
- Replacement for multiple cartridge filters for greater convenience
- Water for livestock & poultry
- Whole house filtration

Low Pressure Drop

Big-Bubba filter housings are designed to minimize pressure drop, by using 2" pipe fittings and a large diameter center tubes for Big-Bubba filter cartridges. (See chart below for pressure drop data using pleated cartridges.)

E-Z Change-Out

Cartridge replacement is easy as 1-2-3:

- Remove swing bolts
- Remove lid
- Rotate cartridge ¼" turn and pull-up

Proprietary Cartridges

We offer a full line of replacement cartridges for Big-Bubba filters, all with double o-ring seals for superior performance. Cartridges are easy to install, easy to service and easy to replace. Some of the filter media we use in select micron ratings are cleanable and reusable to reduce filtration costs.

TERMS AND CONDITIONS

Payment Terms

We accept Visa, MasterCard, Amex, or other advance payment via wire transfer, check or other certified funds. Payment terms are available with an approved credit application. H2O Filter Warehouse requires all initial orders to be prepaid.

Minimum Orders

Minimum Order is $30 per shipment (Samples Excluded). Orders less than $30 will be accepted with a $7.50 Order Processing Fee. This fee allows us to earn a few dollars, instead of losing a few, when processing small orders.

COD Terms

H2O Filter Warehouse does not ship COD.

Shipping

All shipments are F.O.B. our warehouse in Marietta, GA. All freight billing is Prepay and Add. We do not use customer shipper numbers for freight billing (i.e. Collect; Third Party billing). Freight quotes are estimates based on the best information available at the time of the request. H2O Filter Warehouse reserves the right to bill for additional freight charges or incidental freight costs that are charged to us, on your behalf by the carrier.

Transportation

Claims for damaged goods in shipment or shortages must be made by the customer directly with the freight company. Once a pallet has been signed for, the trucking company removes itself from any responsibility for missing boxes, and/or damage. H2O cannot be responsible for damages or lost packages caused by freight carriers.

International Orders

International Orders must be prepaid in full in U.S. funds via wire transfer. Many product warranties do not provide coverage outside the U.S. H2O makes no guarantee of warranty coverage, serviceability, or compatibility for products that are used outside of the U.S. All duties, customs, taxes, tariffs, import fees, broker charges, etc. are the responsibility of the purchaser.

Returns

All returns must be approved by H2O Filter Warehouse and a return authorization (RA) form with a number must be issued. Sales returns are allowed for a maximum

Returns (cont.)

of 30 days from the original invoice date. A restocking charge of 15% will apply to returned goods. Products must be received in commercially resalable condition to be eligible for refund. Products returned wet or having been wet or not in their original factory packaging or shrink wrapping are not eligible for refund. Merchandise must be returned to H2O Filter Warehouse freight prepaid. Any restocking fee that is charged to us by our supplier, on your behalf, will be passed on. (See Returns Goods Policy) Shipping services are not refundable. Special Order or Custom-Built Equipment is not eligible to be returned. Special Order Goods are not returnable.

Verbal Orders

We prefer all our orders to be placed in writing via fax or email. Verbal orders and changes to orders will be accepted only with the understanding that H2O Filter Warehouse is not responsible for freight charges for returned merchandise ordered verbally. We will fax or email an order confirmation for your review to help ensure accuracy.

Limited Warranty

Many H2O Filter Warehouse products have a limited warranty covering workmanship and materials. Some products sold by H2O Filter Warehouse have no warranty, or they are covered by the original manufacturer's warranty. Please contact H2O Filter Warehouse for more information regarding warranties.

Product Suitability

Suitability of any product for any application is the responsibility of the buyer. H2O makes no warranty, expressed or implied, concerning any product and its suitability.

Prices

Prices are subject to change without notice. Our web site has our latest PDF version of this document, with our latest prices, available to download anytime.

Past Due Accounts

H2O Filter Warehouse does not ship orders to customers whose account is past due. A 1.5% per month service charge will be applied to all past due accounts.
